Content Performance (Initial Observations)

- **Recent Post (April 21):** A video post related to "Gospels Oracle" or similar spiritual/esoteric content.
- **Content Themes:** Online retail (candles, wax products), spiritual/esoteric content, personal life.
- **Engagement:** The page seems to have a decent follower base (2.6K), but recent engagement on the visible post was not immediately quantifiable without logging in.

Audience Engagement Patterns

- **Target Audience:** Likely interested in handmade products (candles, wax melts), spiritual growth, and local Leeds community.
- **Posting Frequency:** Needs further investigation, but the last post was April 21.

Research Insights (2026 Best Practices)

Optimal Posting Times (UK Focus)

- **Overall Best Time:** Thursdays between 4:00 PM and 11:00 PM.
- **Video Content:** Ideal between 10:00 AM and 12:00 PM (mid-morning breaks).
- **General Engagement:** Mid-mornings (9:00 AM – 11:00 AM) and early evenings (6:00 PM – 8:00 PM).
- **High Traffic Days:** Tuesdays and Wednesdays (12:00 PM – 8:00 PM).

Content Strategy Trends for 2026

- **Reels & Video:** Facebook explicitly prioritizes original organic content and Reels. Short-form videos (15-30 seconds) with a "talking head" format are highly effective.
- **Community Building:** Encouraging discussions through questions and polls is crucial for building a loyal following.
- **Authenticity:** Moving away from "posting more" to "posting with intention"—sharing insights, tips, or opinions.
- **Local Engagement:** For a Leeds-based business, participating in local online events and groups can significantly expand reach.

Engagement Patterns for Retailers

- **Product Showcases:** Using high-quality photos and videos of products (like candles and wax melts) in lifestyle settings.
- **Behind-the-Scenes:** Sharing the process of creating products to build trust and authenticity.
- **Customer Interaction:** Responding to all comments and messages to foster a sense of community.
