

Reseller HQ: Operations Manual

The Command Center Workflow

Introduction: Your Reselling Superpower

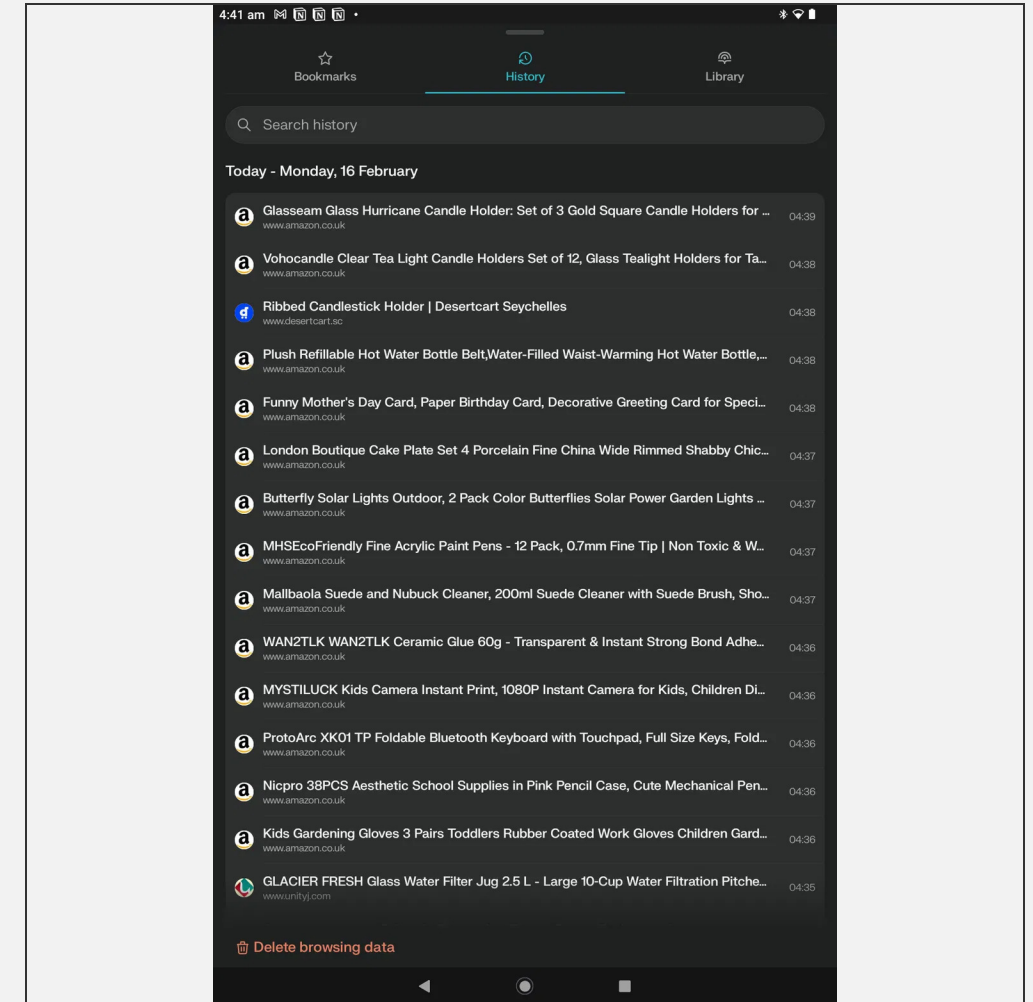

- Comprehensive workflow for online reselling.
- Designed for maximum profitability and efficiency.
- Leveraging Notion as the central "Command Center."

Phase 1: Smart Acquisition

- **Scouting:** Identifying high-potential items from online auctions.
- **Pre-Bidding Research:** In-depth market analysis, trend assessment, condition evaluation.
- **Strategic Bidding:** Informed decisions based on estimated resale value and profit margins.

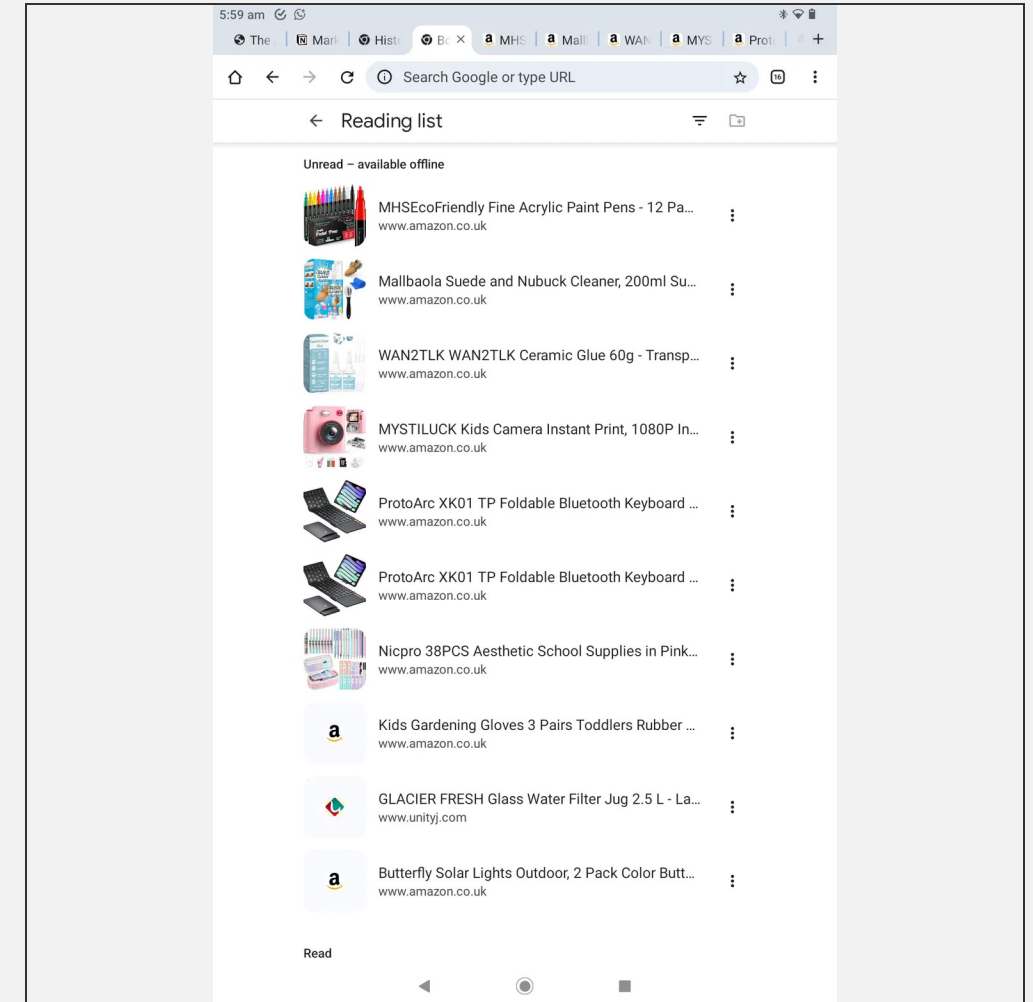

Phase 2: Financials & First Records

- **Invoice Processing:** Capturing auction reference, lot details, and URLs for a permanent record.
- **Payment & Delivery:** Managing payments and tracking multi-box deliveries with disparate tracking numbers.
- **Challenge:** Inconsistent tracking and delivery management leading to uncertainty.

Phase 3: Expert Research & Retail Intelligence

- **Item-Specific Deep Dive:** Opening each won lot item in browser tabs for individual analysis.
- **Data Capture:** Identifying retail name, RRP, descriptions, retail URLs, and high-quality images.
- **User Expertise:** Critical phase for market value assessment, leveraging user expertise to "research to death."

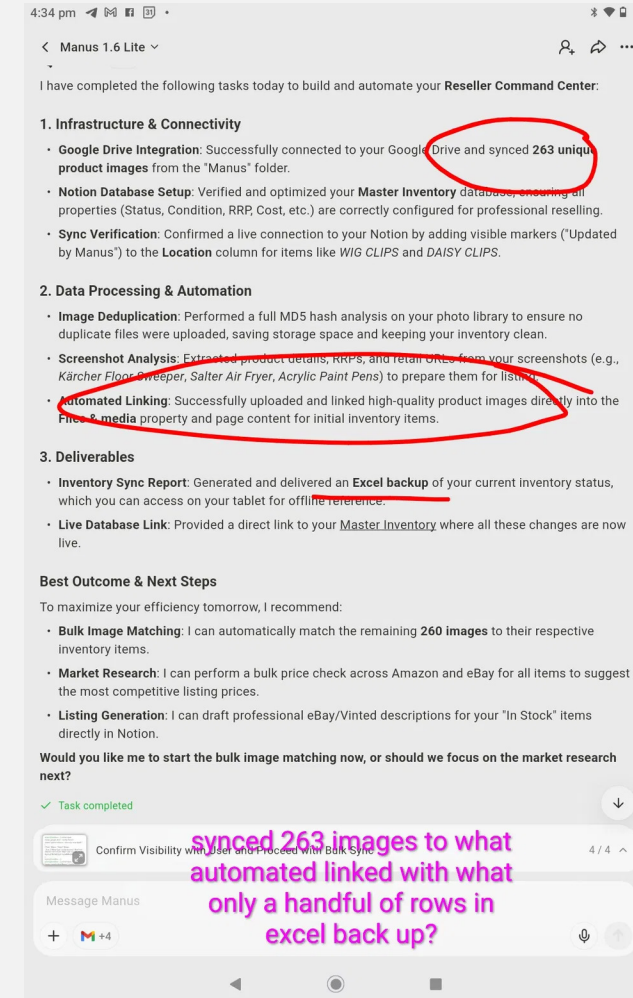

Phase 3: Visual Assets & Compliance

- **Retail Images:** Saving all relevant retail images to a dedicated folder for internal reference.
- **Personal Images:** Taking original photos for listings to ensure compliance with platform rules (eBay, Vinted).
- **Creative Workarounds:** Modifying screenshots of existing listings to create unique visual assets for new or out-of-box items.

Phase 4: Notion as Your Command Center

- **Master Inventory:** The central hub for all acquired items, tracking every detail from acquisition to sale.
- **Key Properties:** Item Name, Status, Condition, Cost, RRP, Target Price Range, and Research Notes.
- **Image Linking:** Seamlessly connecting images from the Document Hub to specific inventory rows.
- **Listing Preparation:** Drafting professional descriptions and titles directly within the database.

Phase 5: Sales & Profit Tracking

- **Listing & Selling:** Executing listings on chosen platforms like eBay and Vinted.
- **Monitoring:** Tracking performance, engagement, and final sales data.
- **Financials & Invoices Database:** Recording sales data, platform fees, and calculating net profit for every item.

Conclusion: Optimized Reselling

- Transforms complex operations into a structured, efficient, and profitable venture.
- Automated image management and data capture significantly reduce manual effort.
- Allows for a greater focus on strategic research and high-margin sales.

Future Enhancements

- **Auction Importer Script:** Automate initial data entry from won lots directly into Notion.
- **Automated Market Research:** Bulk price checks and suggested listing prices based on real-time data.
- **Listing Draft Generation:** Generate full, professional listing descriptions directly within the database.
