

cant use emails till 100 £

You're right: Gumroad won't let you send emails until you've earned the equivalent of 100 (they say 100 after fees and received at least one payout), so the Emails and Workflows tab are effectively locked for you right now.^[1] ^[2] ^[3]

So we switch strategy: use Gumroad only as the checkout + file delivery, and do your *email marketing + nurturing* through an external email tool (MailerLite, Mailchimp, ConvertKit, etc.), plus social.

1. What the £100 limit actually means

- Gumroad requirement:
 - “You cannot send emails until you've earned \$100 after fees and received a payout.”^[2] ^[1]
 - In practice this is more like \$115+ in sales to reach \$100 paid out after fees.^[3]
- Until you hit that:
 - You can still sell products.
 - You can still collect buyer emails (to export).
 - But you can't send broadcasts/updates or set up Gumroad Workflows.^[2] ^[3]

Result: for now, Gumroad = **shop**; external service = **newsletter + launch emails**.

2. How to market the course *without* Gumroad emails

Think in three parts:

1. Traffic source (where people find you)
2. Email list outside Gumroad (MailerLite, etc.)
3. Gumroad product (checkout + delivery)

Step 1 – Pick your external email platform

- Options that work well for a solo creator:
 - MailerLite (good free tier, simple automation).
 - ConvertKit (more creator-focused, but stricter free tier).
 - Mailchimp (fine, but can feel heavier).

- What you need it to do:
 - Have a **signup form / landing page**.
 - Let you send broadcasts (your launch emails).
 - Let you build simple **automations** (Oracle → Module 1 → course pitch).

You already have a MailerLite setup guide in your launch pack, so MailerLite is a natural fit.^[4]

3. Marketing funnel that ignores the £100 limit

Use the same funnel we designed, just routed through your own email system instead of Gumroad's.^[4]

- 1. People discover you
 - Instagram, YouTube, TikTok, etc.
 - You talk about Gnosis, Oracle, Gnostic Practices for Beginners.
- 2. They go to Oracle / free Module 1
 - On your site: Oracle + email gate after 3 questions → sends them to MailerLite, not Gumroad.^[4]
 - Or a simple MailerLite landing page: “Get Module 1 free + ask the Oracle.”
- 3. Your MailerLite sequence does the nurturing
 - Welcome email with Module 1 PDF/link.
 - Then the same 7-day launch email sequence we wrote, but sent from MailerLite.
 - Every CTA button links to your Gumroad course page.
- 4. Gumroad only takes the payment
 - They buy, Gumroad delivers files and gives you their email for records.
 - You can periodically export buyer emails from Gumroad and import them into MailerLite for segmentation.

This way, your whole marketing engine ignores the Gumroad email restriction until you've hit the threshold.

4. Concrete promotion moves you can start today

Even without Gumroad Emails, you can:

- Add your MailerLite signup link everywhere:
 - Instagram / TikTok / X bios (“Ask the Oracle and get Module 1 free – link”).
 - YouTube description and pinned comment.
 - Website navigation (“Free Oracle / Module 1” goes to your email form).
- Talk constantly about the *same* path:
 - “Oracle → Module 1 → 8-module Gnostic Practices for Beginners course.”

- Every post, in some way, points back to that journey.
- Build a simple content loop:
 - 3 short videos a week: one teaching, one story, one behind-the-scenes of the course.
 - Every caption: “Link in bio to meet the Oracle and get the free Module 1 taster.”
- Reach out to potential affiliates *now*:
 - You can still use the Gumroad Affiliates tab even if you can’t email.^[5]
 - Give them an affiliate link + swipe copy; they send to their list, traffic goes to your MailerLite landing page or direct to Gumroad.

5. When you *do* hit £100 on Gumroad

Once you’ve crossed the threshold and had a payout:^[3] ^[2]

- Turn on Gumroad Emails for:
 - Quick product-specific updates (e.g. “Module 4 now includes X”).
 - Re-engaging past customers directly from Gumroad.
 - Simple post-purchase workflows.
- Keep your main list outside Gumroad:
 - That’s still where your “home” newsletter, storytelling, and launches live.
 - Gumroad becomes a **supporting channel**, not your entire email strategy.^[6] ^[7]

If you tell me which external email platform you’d like to use (MailerLite / ConvertKit / Mailchimp / something else), I can give you a **step-by-step setup** just for Veil Cartography, including what your first form/landing page should say.
