

CURRENT PORTFOLIO SYSTEM

SYSTEM LAYER (CORE OS)

Personal AI Operating System (Notion-based)

Human-in-the-loop system for managing decisions, tasks, and information

Agent Framework:

Mach – strategy and decision making

Michelangelo – creativity

Smith – commerce

James Watt – optimisation

Core Pipeline:

Input → AI Dump → Triage → Extract → Tasks / Products / Logs

GNOSTIC / ORACLE SYSTEM

Purpose: meaning, philosophy, insight

Gnostic Chat (interactive tool)

Veil Cartography (courses/products)

Platforms: TikTok, YouTube, Instagram, Facebook

AI TOOLS / PRODUCT SYSTEM

AI Onboarding Map

Collects user behaviour and tools used

Outputs personalised AI tool recommendations

DREAMY DEALS (RESELLER SYSTEM)

AI-supported auction buying system

Email agent captures auction opportunities

Browser assistant evaluates listings

Decision Rules:

- Profit thresholds: £20 standard / £30–£50 bulky

- Shipping tiers and logistics decisions
- Outputs: RRP, resale value, max bid, delivery cost

CORE INSIGHT

You build decision systems across:

1. Meaning (Gnostic)
2. Tools (AI products)
3. Money (Reseller system)

This is a system-level portfolio, not individual projects.
